

Microsoft Office 365 from BCM One

Microsoft powers many businesses large and small. Office 365, Exchange, Skype for Business, SharePoint—they all enable your employees to be connected, collaborative, and productive anytime, anywhere, and on virtually any device. But licensing, provisioning, and managing your Office 365 environment can be complex. BCM One is your partner in all things Microsoft, so your team can focus on doing what they do best.

BCM One Helps You Get the Most from Office 365

As a Managed Microsoft Gold Partner, our in-house team of Microsoft-certified architects and consultants can support you with all your Office 365 needs.

- **Licensing:** BCM One offers licensing flexibility, avoiding the lock-in of a yearly contract, so you can scale up or down as needed on a monthly basis.
- **Migration and deployment:** Whether you're migrating—from on-premises deployments or different solutions—or starting a new deployment from scratch, BCM One handles the project management every step of the way. We offer a range of migration packages, from a fast and streamlined move all the up to large custom migrations with voice and data integration.
- **Ongoing support and services:** BCM One offers maintenance and support services to maximize your investment in Office 365, including managing Exchange, creating customized SharePoint sites, setting up call routing for Skype for Business, and many others.
- **Training:** We can train your employees, on site or virtually, so they are able to take advantage of all the capabilities available to them.

BCM One: Your Go-To for Microsoft Office 365
