

# Managed Connectivity

## Reliable and Streamlined Network Management

In today's distributed cloud age with data and applications living everywhere, a network isn't just a tool—it's a lifeline. For businesses, maintaining a robust, secure, and efficient network across diverse locations is both essential and challenging. That's where BCM One steps in.

### Managed Connectivity

#### Transforming Network Complexity into Simplicity

BCM One's Managed Connectivity ensures that your critical communications network remains in optimal health. By aggregating your connectivity needs into a single invoice and overseeing all the details, we free you to channel your resources and attention to other strategic priorities.

### Why Choose BCM One?

- **Streamlined Administration**  
Multiple carriers mean multiple invoices and challenges. BCM One simplifies the landscape, offering you a holistic overview and efficient management.
- **Always-On Vigilance**  
Our expert team vigilantly monitors your network 24/7/365, ensuring continuous uptime and swift action at the slightest hint of an issue.
- **Strategic Network Design**  
Starting with a comprehensive understanding of your current and projected business needs, BCM One crafts a network design that minimizes risks, delays, and costs, all while maximizing reliability, availability, and scalability.

## Core Features:

### > Versatile Connectivity

Whether you need private or public WAN connectivity, we ensure secure and reliable transport of crucial applications.

### > Global Supplier Relationships

Through our connections with leading global suppliers, we guarantee the right solution tailored to your connectivity needs.

### > SD-WAN Solutions

For businesses spanning vast geographical areas, our SD-WAN solution optimally allocates network bandwidth across connection points and global gateways.

## Experience the BCM One Advantage

- **24/7/365 Proactive Monitoring & Restoration:** Powered by our VitalView™ platform, receive uninterrupted proactive monitoring and restoration services across all devices, services, and providers.
- **Single Point of Contact:** With BCM One, get a unified point of contact for all monitored services, devices, and carrier liaisons.
- **Industry Expertise:** Our monitoring and engineering teams are industry stalwarts, holding over 55 certifications, ready to provide unmatched multi-vendor support.
- **Customized Service Levels:** We don't believe in one-size-fits-all. Our services are tailored to match your specific business and technical requirements, from monitoring to management.

## BCM One Managed Connectivity:

Your Network, Our Priority. Streamlining connectivity, ensuring uptime, and simplifying management across all your locations.
