

Improve Employee Efficiencies

BCM One's Unified Communications as a Service (UCaaS) is a hosted voice solution that runs on the BroadWorks® platform. It utilizes the latest cloud-based technology to connect your business without the high costs of a traditional premises-based system. This solution brings together essential communications services, such as instant messaging, presence, voice and video calling, multi-party video collaboration, and desktop sharing in real-time to enhance business productivity. Team members can access information quickly and provide better customer service.

Connect, Call, and Collaborate with any phone, smart device, or laptop

- **Presence:** Indicator displays status, location and time zone, allowing you to choose the best way to communicate
- **Instant Messaging:** Send and receive messages, or initiate a group chat to get answers quickly
- **Video Calling:** Initiate or accept video calls on your laptop, video-enabled phone, smartphone, and tablet for more effective, face-to-face communications
- **Integrated Business Calling Capabilities:** Access business calling features for inbound and outbound calls. Enjoy a seamless user experience in a fully hosted environment, or connect with SIP Trunking to existing PBXes
- **Multi-Party Voice and Video Collaboration:** Bring teams together for impromptu and planned meetings using High Definition voice and video. Interact with disparate locations, remote workers, and even external customers, prospects, and partners easily
- **Desktop Sharing:** Share project plans with the internal team, or work products, contracts, or other media with customers and partners. Reach consensus faster and close business

A Better Way To Do Business

- **Teamwork** – Bring together individuals and virtual workgroups for scheduled and impromptu meetings to improve team collaboration and productivity. Share documents for more accurate version control and team input
- **Reachability** – Access communication services through a single application on mobile devices. Turn your personal phone into a business phone to make and receive calls, and collaborate on the go from any location with the most popular mobile devices
- **Savings** – Reduce costs and eliminate inefficient processes associated with traditional on-premise services upgrades. Connect to remote workers and cut travel expenses using collaboration tools, such as video conferencing and desktop sharing
- **Responsiveness** – Give employees instant access to information for expedited responses to better serve customers. Simplify partner, prospect, and customer interaction with voice, video, chat and browser-based desktop sharing
