

Managed SIP Trunking

Delivering Quality, Availability, and Visibility

Managed SIP (mSIP) provides businesses with reliability and uptime of their voice services. Managed SIP is provided by our award winning nexVortex brand, a BCM One Company.

Quality: Multiple Connection Options

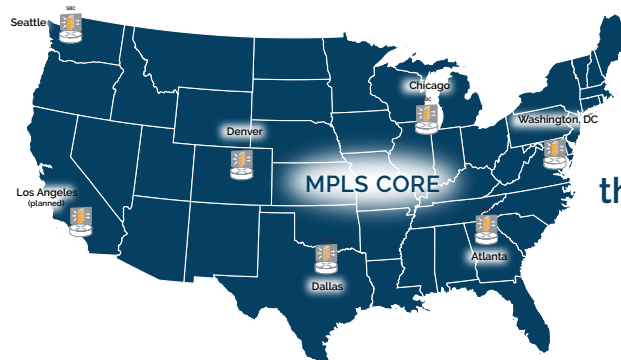

- › Our peering relationships reduce latency, packet loss, and jitter by connecting directly to our mSIP network
- › Edge SBC traffic prioritization
- › Optional BCM One provided internet access with CoS

Availability: Monitoring + Disaster Recovery

- › Redundancy through multiple data centers
- › LAN level autodetecting disaster recovery
- › Optional dual WAN failover
- › Toll-Free RespOrg

Visibility: Eliminates Finger Pointing

- › Call quality analytics taken at multiple points in call path
- › Monitoring from customer premises outward
- › Alarming with proactive notification

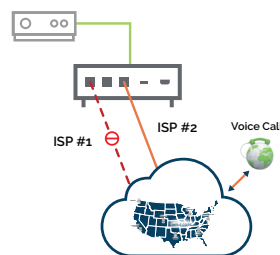

Redundancy through Multiple Data Centers

At a Glance:

- › Interoperable and Tested with Most PBXs, PRI Handoff optional
- › Onsite SBC Provided
- › Definitive Troubleshooting
- › Autodetecting Disaster Recovery for Each DID & TF Number
- › Multisite E911 Portal Tools
- › MultiPBX Trunk Sharing Capability

mSIP with Dual WAN Failover
