

SD-WAN for UCaaSone Enterprise

There's no question that VoIP is a flexible and cost-effective voice solution. But some businesses are reluctant to make the move to an over-the-top offering due to concerns about call quality and security and are hanging on to legacy PRIs and MPLS-based SIP solutions. The good news is that with SD-WAN for UCaaSone™ Enterprise, you no longer need to make that trade-off.

BCM One's UCaaSone Enterprise is a hosted voice service that utilizes the latest cloud-based technology to connect your business without the high costs of a traditional premises-based system. And our Managed SD-WAN solution supports modern bandwidth requirements by prioritizing and intelligently directing network traffic. SD-WAN for UCaaSone Enterprise brings these two powerful solutions together to deliver the modern hosted voice capabilities you want with the QoS and security you need. No need to worry about circuit latency, jitter, packet loss and outages.

The SD-WAN for UCaaSone Enterprise Advantage

- **BCM One UCaaSone Enterprise** leverages the BroadSoft® platform to deliver essential communications services, including instant messaging, presence, voice and video calling, multi-party video collaboration, and desktop sharing in real time to enhance business productivity. This managed UCaaS offering not only supports both office-based and mobile employees with standard resources, but provides significant flexibility, reliability, and scalability to meet ever-changing requirements.
- With **SD-WAN from BCM One** that uses Versa gateways in our POPs, you get the reliability and security of SD-WAN without the burden of managing the connectivity circuits and carriers.
- **VitalView™**, our proactive, 24x7 monitoring tool, provides added insurance for optimal performance.

The combination of our Versa SD-WAN solution, our UCaaSone Enterprise hosted voice solution, plus our VitalView proactive monitoring and management service, gives businesses a complete voice solution with QoS, security and business continuity assurance. This solution is ideal for:

- Existing BCM One UCaaSone Enterprise customers that want to add-in the SD-WAN component
- BCM One SD-WAN for Versa clients that want to add in the voice quality component
- OR new customers that want a total new solution purchasing both BCM One's UCaaSone Enterprise and our SD-WAN for Versa solution giving them our SD-WAN for UCaaSone Enterprise service for voice quality, security and business continuity

Secure Transport of Voice & Voice Duplication

Secure Transport of Voice:

Voice Duplication Explained:

Benefits of SD-WAN for UCaaSone Enterprise

- Voice delivered over diverse dual circuits for QoS and business
- Secure voice that uses the latest encryption technologies on overlay tunnels
- Definitive trouble-shooting
- Proactive, 24x7 monitoring
- SLA backed for SDWAN and UCaaS
- Packet duplication that guarantees up-time on calls
